## Revolutionizing Law Firm Efficiency: Kim Document Releases New eBook on Automation and Templates

**London, June 22, 2023**: Kim ([www.kimdocument.com](www.kimdocument.com)), the no-code, SaaS, patent-protected document generation, assembly, and workflow automation platform, today announced the release of their latest eBook, "Streamlining Legal Workflows: How templates and automation can save time and boost productivity." This comprehensive guide explores the power of automation and templates in boosting efficiency, productivity, and profitability for law firms of all sizes.

Law firms are constantly seeking ways to streamline their processes and deliver exceptional client service. This eBook sheds light on how automation can transform routine tasks such as document creation, compliance management, and data collection. By harnessing the power of automation, law firms can free up valuable time, reduce errors, and focus on higher-value work.

Templates are another integral aspect covered in the eBook. Standardized templates for standard legal documents and client-specific needs ensure consistency, accuracy, and significant time savings. Whether it's drafting NDAs, creating employment agreements, customizing documents for specific cases, tracking infosec training compliance, or completing new supplier questionnaires, templates simplify and expedite the process while maintaining work quality.

"Our aim with this eBook is to equip law firms with practical insights and strategies to enhance their operational efficiency," said **Melody Easton, VP of Marketing at Kim**. "By adopting automation and templates, law firms can optimize workflows, provide better client service, and stay competitive in today's dynamic legal market."

The eBook delves into the benefits of automation and templates, providing real-world examples, best practices, and ready-to-use templates to help get firms started. Fee earners such as law firm partners, attorneys, paralegals, and operational teams such as compliance or information systems support staff will find valuable guidance on how to work smarter and maximize their firm's potential.

[Download the eBook](#) to gain access to this invaluable resource and increase productivity in your law firm. Take advantage of this opportunity to revolutionize the way you work and unlock your firm's full potential.

**About Kim**

Kim is a no-code, SaaS, patent-protected document generation, assembly and workflow automation tool. Kim's Enterprise solution is proven with Fortune 500 organizations in legal, compliance, contract management, company secretarial, office productivity and other functions.

Kim's Business tier allows any function or role in small, medium or large organizations to take their existing Word documents and automate them plus turn them into web applications that can be shared internally and/or externally.  It automates letters, forms, records, checklists and contracts in minutes, with no training, integrates seamlessly with MS Teams, and is accessible from any browser.

Kim has two patents. When a DOCX template is uploaded into the Kim software it gains additional knowledge by learning the structural composition of each template and it can interface with any

authenticated and authorized client over HTTPS with an intelligent understanding of the correctness of the data being supplied. This enables the automatic extraction of tags from the multiple sample documents, the storing of the tags in a data schema separate from the documents, automatically generating structural schemes from the tags, automatically creating document templates from the sample documents and processing the document templates to create unique identifiers (see 'Patent Headlines' section and the Kim patent: https://patents.justia.com/patent/10817662.
